TITLE OF INVENTION: AUCTION SYSTEM FOR REMOTE BIDDING AND METHOD

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	YES	\$720	\$300	\$0	\$1020	07/14/2008

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 1035 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 1035 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

Claims 3-34 have been examined.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: The replacement for paragraph [0095] is hereby relabeled "[0095]" rather than [0001], as it was mislabeled on page 40 of the amendment of March 10, 2008, by an evident clerical error.

Allowable Subject Matter

Claims 3, 4, and 6-13 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Faris et al. (U.S. Patent 6,677,858), discloses a system for conducting interactive auctions with remote bidders, comprising: an auction system that maintains information related to a subject of an auction, the auction system establishing a price at which the subject of the auction is offered (column 55, line 58, through column 56, line 16); and a remote bidder system that communicates a bid including bid information to the auction system, the auction system using at least a portion of the bid information to accept the bid if it is timely, and reject the bid if the bid is not timely

(column 59, lines 6-46). Faris does not disclose that the bid accepts an offer for the subject of the auction at the price established by the auction system, but online auctions where bids are of this nature are well known, as taught by Maybury ("Boot Camp; Online Auctions Part One") (whole article, especially paragraph beginning, "At the end of the auction"). The auction system described by Maybury would normally accept the bid where the price of the auction had not changed, and in many cases reject it if the price for the subject of the auction had changed, that is, where a higher bid submitted by someone else had resulted in a current minimum acceptable bid higher than the amount.

Faris discloses that the auction system is operable to maintain a time related information associated with the price of the subject at a time during the auction (column 59, lines 6-17) and that the bid information includes a time related component comparable to the time related information maintained by the auction system (column 59, lines 18-46). Faris's auction server matches bids and offers, rather than necessarily maintaining a single price for the subject of the auction, but Maybury teaches maintaining a price (whole article, especially paragraph beginning, "At the end of the auction").

Faris discloses that the time related information associated with the price of the subject matter is time data associated with the time during the auction when the subject matter is auctioned for a price (column 59, lines 17-46). However, Faris does not disclose that the auction system uses the time data to determine whether the price of the subject of the auction has changed, nor does any other prior art of record quite

teach doing this. There is no motivation in Faris, the other prior art of record, or the knowledge generally available to one of ordinary skill in the art to graft using the time data to determine whether the price of the subject of the auction has changed on to Faris's system, which is directed to determining whether the proper time for submitting bids had begun or ended at the time a bid was sent out and timestamped.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim 5 is allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Faris et al. (U.S. Patent 6,677,858), discloses a system for conducting interactive auctions with remote bidders, comprising: an auction system that maintains information related to a subject of an auction, the auction system establishing a price at which the subject of the auction is offered (column 55, line 58, through column 56, line 16); and a remote bidder system that communicates a bid including bid information to the auction system, the auction system using at least a portion of the bid information to accept the bid if it is timely, and reject the bid if the bid is not timely (column 59, lines 6-46). Faris does not disclose that the bid accepts an offer for the subject of the auction at the price established by the auction system, but online auctions where bids are of this nature are well known, as taught by Maybury ("Boot Camp;

Online Auctions Part One”) (whole article, especially paragraph beginning, “At the end of the auction”). The auction system described by Maybury would normally accept the bid where the price of the auction had not changed, and in many cases reject it if the price for the subject of the auction had changed, that is, where a higher bid submitted by someone else had resulted in a current minimum acceptable bid higher than the amount.

Faris et al. (U.S. Patent 6,677,858) and Maybury (“Boot Camp; Online Auctions Part One”) make the system of claim 1 obvious, as set forth above. Faris further discloses that the bid information includes a first data indicative of an offer for from the remote bidder system for the subject of the auction and a second data related to a time associated with the price of the auction (column 55, line 58, through column 56, line 30; column 59, lines 6-46). However, Faris does not disclose that the auction system uses the second (time-related) data to determine whether the price of the subject of the auction has changed, nor does any other prior art of record quite teach doing this. There is no motivation in Faris, the other prior art of record, or the knowledge generally available to one of ordinary skill in the art to graft using the time data to determine whether the price of the subject of the auction has changed on to Faris’s system, which is directed to determining whether the proper time for submitting bids had begun or ended at the time a bid was sent out and timestamped.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 14-21 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Faris et al. (U.S. Patent 6,677,858), discloses a method for remote auction bidding, comprising: communicating an auction system price to a remote bidder system (column 55, line 58, through column 56, line 21); and transmitting a message related to the subject of the auction from the remote bidder system to the auction system (column 56, lines 17-30; column 59, lines 17-46). Faris does not precisely disclose updating an auction system with an auction system current price established by the auction system for a subject of an auction, or messages from bidders including bid offers acknowledging acceptance by the remote bidder system of the auction system current price for the subject of the auction, but these are well-known features of online auctions, such as those described Henry ("But Can You Get It Wholesale?"), and by Maybury ("Boot Camp; Online Auctions Part One"). Faris discloses accepting or rejecting a bid according to the time at which the bid is sent, and the current price of a subject of an auction may change over time, but neither Faris nor any other prior art of record discloses accepting, by the auction system, the bid offer where a then current bid price maintained by the auction server for the subject of the auction is the same as the remote bidder system current price; and rejecting, by the auction system, the bid offer

where a then current bid price maintained by the auction server for the subject of the auction is different from the remote bidder system current price.

In a typical online auction system, a bid may be accepted or rejected according to whether the price has changed, and whether the price change is sufficient; e.g., if John Doe, a bidder, sees that the displayed by bid for an item is \$100, he can submit a bid of \$101, and his bid will be accepted if the previous high bid is still \$100 when his bid is processed at the auction server, but not accepted if someone else has bid \$102 before his bid is received and processed. In such a situation, however, it is not the fact of the current price maintained by the auction system being the same as or different from the remote bidder system current price which is key. If, by the time John Doe's \$101 bid is received and processed, someone else has submitted a bid for \$100.50, the current price maintained by the auction system will be different from the remote bidder system current price of \$100, but John Doe's \$101 bid would presumably still be accepted.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 22-34 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Faris et al. (U.S. Patent 6,677,858), discloses a method for remote

auction bidding, comprising: communicating an auction system price to a remote bidder system (column 55, line 58, through column 56, line 21); and transmitting a message related to the subject of the auction from the remote bidder system to the auction system (column 56, lines 17-30; column 59, lines 17-56). Faris does not precisely disclose updating an auction system with an auction system current price established by the auction system for a subject of an auction, or messages from bidders including bid offers acknowledging acceptance by the remote bidder system of the auction system current price for the subject of the auction, but these are well-known features of online auctions, such as those described Henry ("But Can You Get It Wholesale?"), and by Maybury ("Boot Camp; Online Auctions Part One"). Faris discloses accepting or rejecting a bid according to the time at which the bid is sent, and the current price of a subject of an auction may change over time, but neither Faris nor any other prior art of record discloses accepting, by the auction system, the bid offer where the auction system current price for the subject of the auction has not changed; and rejecting, by the auction system, the bid offer where the auction system current price for the subject of the auction has changed.

In a typical online auction system, a bid may be accepted or rejected according to whether the price has changed, and whether the price change is sufficient; e.g., if John Doe, a bidder, sees that the displayed by bid for an item is \$100, he can submit a bid of \$101, and his bid will be accepted if the previous high bid is still \$100 when his bid is processed at the auction server, but not accepted if someone else has bid \$102 before his bid is received and processed. In such a situation, however, it is not the fact

of the price having changed, or not changed, which is key. If, by the time John Doe's \$101 bid is received and processed, someone else has submitted a bid for \$100.50, the price has changed, but John Doe's \$101 bid would presumably still be accepted.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
